Head of Department

No. PSW/ 660 /MHL

Dated: 9/9/2026.

To,
The Chief Executive Officer
Mayo Hospital Lahore.

Subject: Submission of Technical Evaluation Report for procurement of Biomedical Gases for the financial year 2026–2027.

Respected Sir,

It is respectfully submitted that the Technical Evaluation Committee has completed the technical evaluation of the bids/proposals received for the procurement of Biomedical Gases for the financial year 2026–2027.

The Technical Evaluation report duly scrutinized and signed by the members of the Technical Evaluation Committee, is enclosed herewith. The recommendations have been made strictly in accordance with the approved technical specifications, mandatory evaluation parameters, and applicable sample evaluation criteria.

It is, therefore, requested that the enclosed Technical Evaluation report may kindly be accepted and processed further under the relevant procurement rules and regulations.

Submitted for kind consideration and further necessary action, please.

VISIT REPORT

Biomedical Gas Plant — Technical Committee Inspection

Date of Visit:	29-08-2026 (Saturday)
Location:	Sharif Oxygen (Pvt) Ltd
Purpose of Visit:	Verification of Part-C parameters and inspection of the plant by the Technical Committee
Report Prepared By:	Technical Committee

1. Background

A visit to the biomedical gas plant of M/s Sharif Oxygen (Pvt) Ltd was conducted on Saturday, 29-08-2026, by a Technical Committee constituted for the inspection of the plant and verification of the Part-C parameters related to the supply of medical gases. The purpose of the visit was to physically verify the technical and regulatory compliance parameters as submitted, and to inspect the plant facility, testing certifications, and backup arrangements available at the site.

2. Committee Members Present

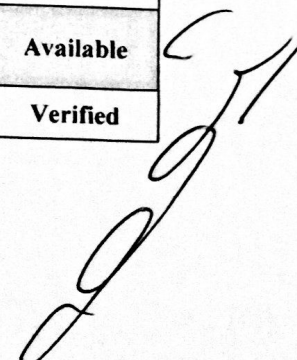

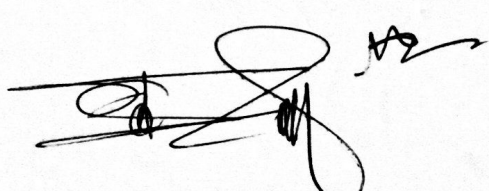

The following members of the Technical Committee were present during the visit:

Sr.	Name	Designation	Role
1	Dr. Muhammad Kashif Bashir	HOD, Paeds Surgery	Chairman
2	Mr. Abdul Jalil	Biomedical Engineer (BME)	Co-opted Member
3	Mr. M. Muneeb Ahmed Mughal	Biomedical Engineer (BME)	Co-opted Member
4	Mr. Ameer Shahid	Drug Controller / Chief Pharmacist	Co-opted Member

3. Part-C Parameters Verified

The committee inspected and verified the following Part-C technical parameters at the plant:

Sr.	Parameter (Part-C)	Observation / Finding	Status
1	Country of Origin & Manufacturing Facility	Verified for the quoted medical gases; details found in order and consistent with submitted documentation.	Verified
2	Purity	Purity level confirmed to be greater than 99% for the medical gases inspected.	Compliant
3	Pharmacopoeia Standard	Confirmed as USP (United States Pharmacopoeia) for each quoted item.	Compliant
4	Certificate of Analysis (CoA)	Certificate of Analysis is available and was produced for review.	Available
5	Hydrotesting of Cylinders	Cylinder Hydrotesting is performed by M/s Sharif	Verified

Sr.	Parameter (Part-C)	Observation / Finding	Status
		Oxygen (Pvt) Ltd through its in house Hydro testing laboratory in accordance with ISO 6406 and applicable medical safety standards	
6	Backup Plant Availability	A backup plant is available at the site; a total of two (02) plants exist on-site, ensuring supply continuity.	Available
7	Tracking facility	Telemetry system is available to keep track of Liquid Oxygen levels at customer site. Transport vehicles are also monitored by the firm.	Compliant

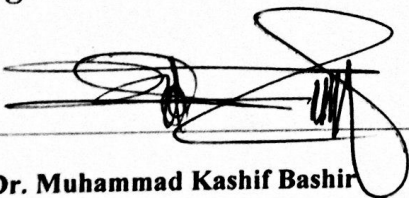

4. Observations

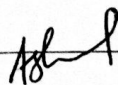

- The country of origin and manufacturing facility for the quoted medical gases were verified and found satisfactory.
- The purity of the medical gases was confirmed to be above 99%, meeting the required standard.
- The pharmacopoeia standard for each quoted item was confirmed as USP.
- Certificate of Analysis (CoA) was available and produced for the committee's review.
- Cylinder Hydrotesting is performed by M/s Sharif Oxygen (Pvt) Ltd through its in house Hydro testing laboratory in accordance with ISO 6406 and applicable medical safety standards • A backup plant is available at the site, bringing the total number of plants at the location to two (02), which ensures continuity of medical gas supply in case of any disruption to the primary plant.

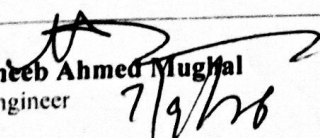

5. Conclusion / Recommendation

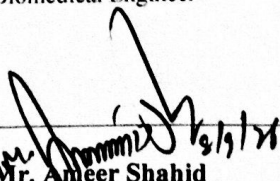

Based on the physical inspection and document verification carried out during the visit, the Technical Committee found the Part-C parameters — country of origin, manufacturing facility, purity, pharmacopoeia standard, Certificate of Analysis, hydrotesting certification, and backup plant availability — to be in order and compliant with the requirements.
